Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I: First embodiment (Figures 1-13) and corresponding claims are 22-26.

Species II: Third embodiment (Figures 16-22) and corresponding claims are 1-13, 27-37, 44-45, 48-51 and 55-60.

Species III: Fourth embodiment (Figures 23-27) and corresponding claims are 38-41.

Species IV: fifth embodiment (Figures 28-32) and corresponding claims are 14-21, 42-43, 46-47 and 52-54.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species I: First embodiment (Figures 1-13) and corresponding claims are 22-26.

Species II: Third embodiment (Figures 16-22) and corresponding claims are 1-13, 27-37, 44-45, 48-51 and 55-60.

Species III: Fourth embodiment (Figures 23-27) and corresponding claims are 38-41.

Species IV: fifth embodiment (Figures 28-32) and corresponding claims are 14-21, 42-43, 46-47 and 52-54.

The following claim(s) are generic: No generic claim.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Species I requires a parallax adjusting means when a 3-D image display time exceeds a predetermined time, reduces the parallax of the 3-d image for the 3-D image forming means while Species II requires control information that denotes 3-D intensity of the 3-D image, Species III requires encoding and decoding means including multiplexing and demultiplexing means for multiplexing and demultiplexing of encoded and decoded control information and Species IV requires a 3-D recording device for recording a 3-D image data wherein recording area includes at least one of an image recording region for recording the 3-D image, an audio recording region for recording audio data, and a sub-code recording region for recording associated information.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
